Createspace, United States, 2011. Paperback. Book Condition: New. annotated edition. 248 x 198 mm. Language: English . Brand New Book ***** Print on Demand *****.This colorful math book introduces a novel visual method for students to master their conversions between fractions, decimals, and percentages. The creative design helps to engage student interest, while the visual layout ties into one of the current pedagogical drives in education - namely, to use visual strategies since research has shown them to be effective learning tools. These visual problems also help to develop visual skills. This volume focuses on the following basic skills: Converting from fractions to decimals and percents. Converting from decimals to fractions and percents. Converting from percents to fractions and decimals. Converting fractions into repeating decimals and percents. Converting repeating decimals into fractions and percents. The back of the book features a table of answers to help students check that they are practicing correct techniques (or it may serve as a grading key for teachers or parents). The book begins with a concise explanation of the concepts with some examples to serve as a guide. The first page of each section includes annotated instructions that explain how to solve the problems. Studying the examples and checking the answers to the first page of each part will help students become confident that they understand what to do. The interior is printed in full color with aesthetic visual patterns. The 8 x 10 pages are nearly the same size as standard school papers that students are used to working with. Each problem includes its own dedicated workspace. The workspaces encourage students to show their work, and the symmetrical structure of the workspaces shows students how to organize their work in neat columns. The copyright notice permits parents/teachers who purchase one copy to make...
