OCLC Number: (OCoLC)73308192 Subject: Agriculture -- Environmental aspects -- Congresses. Excerpt: . . . Emerging Compounds 7 Breakout Session Future Technical Directions 1. Improvement of chemical methods. Need lower detection limits. Wider range of compounds needs to be analyzed (including hormones). Get current methods reviewed and approved; make methods available to broader scientific community. 2. Improvement of biological methods. Methods to identify specific pathogens, bacteria, viruses. 3. Immunoassay methods. Potentially useful for field-screening to define where to focus more intensive study. 4. Quantifying exposure and the ecological effects from this exposure. Begin analyzing only for compounds that have demonstrable effects. 5. Establish consistent national-scale monitoring methods (sampling, analysis) for emerg-ing compounds, pathogens, and microbes. Train technical staff in these methods. 6. Establish biological infrastructure for long-term monitoring using consistent protocols. 7. Research on source transport fate for emerging compounds. 8. Obtain basic chemical data on emerging compounds (for example, kinetics). This information may be available from chemical producers. Communication 1. Present results to emphasize...
