After three US-designed plants exploded in Japan, many countries moved to abandon reactors for renewables. In the United States, however, powerful corporations and a compliant government still defend nuclear power-while promising billion-dollar bailouts to operators. Each new disaster demonstrates that the nuclear industry and governments lie to avoid panic, to preserve the myth of safe, clean nuclear power, and to sustain government subsidies. Nuclear Roulette cites NRC records showing how corporations routinely defer maintenance and lists resulting near-misses in the US, which average more than one per month. Nuclear Roulette chronicles the problems of aging reactors, uncovers the costly challenge of decommissioning, explores the industry s greatest seismic risks-not on California s quake-prone coast but in the Midwest and Southeast-and explains how solar flares could black out power grids, causing the world s 400-plus reactors to self-destruct. This powerful expose concludes with a roundup of proven and potential energy solutions that can replace...
