See also equation (31), Chapter VI. A condenser in the secondary might reduce this angle to 900 or make it even less, as is seen from the equations, and will be shown later graphically. Make and Break with Harmonic Electromotive Force.--In the discussion of the current flow in the primary and secondary of a transformer subjected to an harmonic electromotive force, the exponential terms which constitute the complementary function have been omitted from the equations, and the currents are simple harmonic functions of the time. These exponential terms modify the current for a short time after the make, but their effects rapidly diminish, and become...
