SOFTWARE FOR ALGEBRAIC GEOMETRY

To download **Software for Algebraic Geometry** PDF, please refer to the link listed below and download the ebook or have accessibility to additional information which might be in conjunction with SOFTWARE FOR ALGEBRAIC GEOMETRY book.

Springer-Verlag New York Inc. Paperback. Book Condition: New. Paperback. 176 pages. Dimensions: 9.0in. x 6.1in. x 0.6in. Algorithms in algebraic geometry go hand in hand with software packages that implement them. Together they have established the modern field of computational algebraic geometry which has come to play a major role in both theoretical advances and applications. Over the past fifteen years, several excellent general purpose packages for computations in algebraic geometry have been developed, such as, CoCoA, Singular and Macaulay 2. While these packages evolve continuously, incorporating new mathematical advances, they both motivate and demand the creation of new mathematics and smarter algorithms. This volume reflects the workshop Software for Algebraic Geometry held in the week from 23 to 27 October 2006, as the second workshop in the thematic year on Applications of Algebraic Geometry at the IMA. The papers in this volume describe the software packages Bertini, PHClab, Gfan, DEMiCs, SYNAPS, TrIm, Gambit, ApaTools, and the application of RisaAsir to a conjecture on multiple zeta values. They offer the reader a broad view of current trends in computational algebraic geometry through software development and applications. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
