Date :2009-02. This book focuses on the theory evolved by the Hong agricultural basic information theory and coding theory. the theory and implementation principle. Book is divided into seven chapters. the introduction of the information metric. based on the focused channel capacity. rate-distortion function. as well as lossless source coding. limited distortion source coding. channel coding and cryptography in the theoretical knowledge and its implementation principles. Book focus on the concept of using popular text. contact the current actual communication system. with more examples and illustrations explain the basic concepts. basic principles of the theory and implementation to minimize the complexity of the formula theorem. Finally. in each chapter with a summary of the content and a large number of exercises. some exercises with the answer book. readers learn to facilitate and deepen the understanding of the concepts and principles. In addition. the book is supported by electronic teaching plan. This book can be used as electronic information science and engineering universities engineering. communications engineering and related professional teaching undergraduate students. but also for communications engineering. electronic engineering and other related professionals to learn science and technology reference. Contents: Chapter 1 Introduction 1.1 The formation and development of information theory model of communication systems Exercise 1.2 Chapter 2 2.1 source and information entropy source description and classification of non-memory source 2.1.1 2.1.2 2.1.3 Markov sources with memory can be husband discrete 2.2 source entropy and mutual information source from the amount of information 2.2.1 2.2.2 2.2.3 discrete mutual information source entropy in information processing 2.2.4 2.2.5 changes the nature of entropy source entropy 2.3 discrete sequence 2.3.1 Discrete Memoryless Source Discrete...
